Experiencia

Development Engineer

March 2023 - Now | JRI

Responsibilities:
- Construir aplicaciones web, como desarrollador Full-stack, con el fin de estandarizar procesos internos de las áreas técnicas de la empresa.
- Diseñar soluciones en base a los problemas presentados por el cliente y dar distintos enfoques sobre cómo solucionarlos.

Key accomplishments:
- Standarized internal process and materials coding for Piping technical area. Data was centralized on a database and the internal process reduced the time needed by ~70%.
- Updated internal web platform from Laravel 6 to Laravel 10.
- Created a personnel update module. Granted access to new staff and updated existing data.
- Repaired personnel data on server's database. Created restrictions and duplicates where deleted.

Used technology:
VueJs, Vuex, Pinia, Bootstrap, Laravel, MySQL Workbench

Reference:
Matías Ignacio Estay Cubillos - Tech Lead
+56 9 79994195

Systems Developer Analyst

May 2022 - February 2023 | Andes Industrial

Responsibilities:
- In charge of the front-end development of the company's projects, defining designs, technologies and libraries utilized.

Key accomplishments:
- Developed the new e-commerce, taking a previous project. Build the designs send by the internal client and solving new requirements.
- Optimized the new e-commerce. Changed front-end architecture to reduce API calls and unnecesary re-renders.

Used technology:
ReactJs, NextJs, Bootstrap, Ant Design, Material UI, Postman
